

ENGINEERING DESIGN

Boston Red Sox Stadium

In 2004, HSA provided structural, mechanical, electrical, and fire protection engineering services for the renovation of the: Gift Shop; Ticket Area; Novelty/Ticket Area; and Sports Director Offices at the stadium.

In 2007, HSA provided structural and electrical engineering services for the construction of a 50' x 145' elevated concrete platform to accommodate a standing bar concession area. Structural design included spread footings supporting a concrete frame and elevated floor slab system.
