

## BROWNFIELD REDEVELOPMENT

### Former Steel Mill

HSA provided groundwater remediation services and Brownfield redevelopment support in the execution of a Brownfields Site Rehabilitation Agreement for the site. As a result, a Sales Agreement was executed for the property, and an Industrial Park is scheduled for development. In anticipation of development and preceding demolition of structures that contain potentially environmentally-sensitive wastes, HSA conducted an inventory of hazardous and universal wastes and provided oversight for the removal, manifesting, and disposal of various wastes.

#### LOCATION

Tampa, Florida

#### SERVICES RENDERED

Environmental Engineering, Brownfield Redevelopment, Hazardous Materials Survey
