

HSA Engineers & Scientists recognized by Florida Trend

Best Firms to Work For in Florida

July 2011: HSA Engineers & Scientists, a leader in engineering and consulting services, has been named a top firm to work for by Florida Trend Magazine -- a business, finance and public policy publication. "Our goal is to recognize companies that strive to build even better workplaces for their employees, thereby strengthening their own as well as Florida's competitive advantage in the national and global arenas," says Florida Trend Publisher Bruce Faulmann.

Companies participated in a survey process that evaluated workplace policies, practices, corporate culture, systems, environment, and overall satisfaction. "We've highlighted the practices of companies that have established themselves as great places to work — including everything from how they train their workers to how they communicate; and the kind of pay and benefits they provide. This is a great opportunity for companies in Florida to learn from each other as they go about improving their own effectiveness," says Mark Howard, Executive Editor.

HSA employs a staff of 300 professionals in offices throughout the southeastern United States with recent expansion into Tennessee and Texas markets. HSA differentiates itself by offering diverse management and design services including: geotechnical engineering, environmental engineering, engineering design, water resource management, materials testing, drilling, geophysics, construction & demolition, and a variety of litigation and forensic investigation services. HSA's employees gave high marks for the firm's commitment to staff, team environment, quality of work, and confidence in its leadership team.
