

# HSA Nashville

prosperity through growth

**HSA**  
ENGINEERS & SCIENTISTS

HSA Engineers & Scientists is pleased to announce our expansion of Forensic Engineering Services into Nashville, Tennessee. Our new branch office will provide a variety of forensic engineering services including: subsidence investigations, structural forensics, catastrophe response, fire investigations, and indoor air quality evaluations.

HSA's success in the insurance industry is attributed to consistently delivering high quality and responsive service. HSA's wide range of investigative and engineering capabilities for the insurance industry include: assisting adjustors in the evaluation of claims, forensic engineering, expert testimony, evaluation and allocation of remediation costs, oversight of remediation activities, and peer review of reports from engineering firms. HSA has earned considerable respect from our peers and clients alike; our reputation has been built through professional and detailed analysis, quality reporting, and rapid responsiveness to our industry clients and their insured's.
