

PRESS RELEASE

John Phillips, PE joins HSA Engineers & Scientists

December 2009: John Phillips, PE, has joined HSA's Tampa office as a Senior Geotechnical Engineer for Geotechnical Services. He received his Bachelor's Degree from the University of Florida in Civil Engineering. Mr. Phillip's has over twenty-one years of experience in geotechnical engineering services for private and public clients including: the University of South Florida, Tampa Port Authority, Hillsborough County Schools, Florida Aquarium and Tropicana Field. As a member of HSA's geotechnical team, he will be integral in project management and client development.

HSA Engineers & Scientists is a driven, multi-faceted science and engineering firm that provides aggressive and effective consulting services for our clients. Our approach promotes intellectual but practical solutions to problem-solving and provides opportunity to our employees, clients, and community. These elements form the basis for quality performance, which has given HSA the essential component of success – credibility.

HSA's array of management and design services include: geotechnical, environmental, engineering design, water resource management, materials testing, drilling, geophysics, construction & demolition, and a variety of litigation and insurance support services. Our accomplishments in these areas have won us the trust and confidence of our clients. They know that we can be depended upon to remain *client focused, solution oriented* and *quality driven*.

Our family of 250 professionals are located in eight offices in the southeastern United States: Tampa, Orlando, Fort Myers, Pensacola, and West Palm Beach Florida; as well as Charleston and Hilton Head, South Carolina; and Savannah, Georgia.
