

**BROWNFIELD REDEVELOPMENT**

**Former Tampa International Center**

HSA provided turnkey environmental, geotechnical and construction materials testing consulting services for the redevelopment of the 30-acre industrial parcel. HSA was responsible for soil and groundwater management during demolition and managed the investigation and assessment of abandoned service rails, abandoned underground fuel storage tanks, and impacted surface water impoundment sediments. HSA also provided geotechnical investigation and consulting expertise for demolition and reuse of existing structural material and construction of the new building foundation. The property was subsequently developed for commercial use as a furniture retail center.

**LOCATION**

Tampa, Florida

**SERVICES RENDERED**

Construction Services, Construction Materials Testing, Environmental Engineering, Geotechnical Engineering
